

QUICK WINS TO OPTIMISE CLOUD COSTS

30% of cloud spend is wasted*

So how can you identify this spend and redirect it to the cloud initiatives that deliver value?

Turn things off!

You can save 75% by switching test environments to run only during office hours. [AWS Cost Explorer](#) is a great tool for technical teams to understand their spend.

Lock-in spend for core activities.

You can commit to a minimum level of usage for core activities. Products like [AWS Savings Plans](#) can save you up to 72% on your bill.

Are you right-sizing & autoscaling?

Could you half the size of an instance and half its cost? Could you use autoscaling to only pay for what you use, rather than peak load?

Detect spend anomalies.

Tools like [AWS Cost Anomaly Detection](#) can notify you if costs are different from normal, so you can seek help sooner.

Cloudsoft specialises in making technology uncomplicated, elevating IT to focus on the applications and services that power the business. Cloudsoft Tempo are expert-led consulting services that make sure you're getting the most out of every pound you spend on cloud.
